

## PEAK MEDICINE: Healthcare in Transition

30<sup>TH</sup> May 2015, 10am to 1pm at Subud Centre, 26a Station St,  
Lewes BN7 2DB

In all nations, healthcare is becoming unsustainable. Although there will have to be money pumped into the NHS, health is really too important to leave to the medical profession. Nor are health and human flourishing something they know about.

If madness, according to Einstein, is doing the same thing repeatedly and expecting a different result, then if we are to flourish together we will soon have to find radically different ways of doing health.

In so many respects the health of each person depends on relationships and on community. This event brings together some local initiatives whose work can contribute to individual and community flourishing.
