

DROWNING IN PLASTIC

We want all supermarkets to agree to:

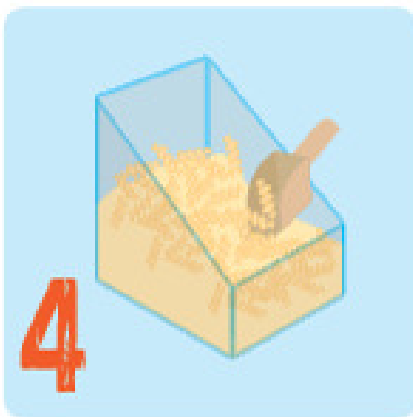

Sell fruit and vegetables without plastic packaging, and provide recycled paper bags to carry them

Stop providing single-use cups and cutlery for customers and introduce a bring-your-own system

Stop using any non-recyclable plastics and switch to genuinely compostable packaging.

Provide hoppers to sell other loose produce, such as nuts, seeds, rice, dried beans and pasta

Require suppliers across both food and non-food product lines to minimise their plastic packaging

...and adopt these measures by the end of 2018, not in five to ten years' time.
